

InfraLytic Mobile App for Oil level sensors NG

Just take a few measurements in passing? Sure it's possible!

And the best of all: The measured data are immediately available for evaluation, including documentation. Use our InfraLytic Mobile App for this.

The App can

- Easily be installed from Play Store, it is for free
- Acquire sets of as many measurements as you need
- Document the individual measured values by means of images and comments.
- Share the measured data, for example by sending them by mail.

Through this you can provide the data on a PC for further evaluation.

Prerequisites

- Android smart phone, version 6 at least.
- InfraLytic oil level sensor from model NG2
- Bluetooth configuration for free device connection on your sensor.
